

## **Botox/Dysport/Xeomin Post Care Instructions**

Apply ice as directed. Be assured that any tiny bumps or red marks will go away within a few hours.

You may have bruises in the areas treated with Botox/Dysport. This is normal. It may take up to two weeks for you to experience the full effect of the Botox/Dysport/Xeomin treatment. Remain patient. It takes time for the muscles to lose strength and the lines to fade following Botox/Dysport treatments. Movement of lines diminished is ok. The objective of the Botox/Dysport treatment is to improve the appearance of the lines, not necessarily paralyze the muscle.

Muscle weakness will take place between 3-10 days after injections. Results of your treatment **may take up to 14 days** to take full effect. Please wait until the 14 days has passed before assessing if you are pleased with the result. Adjustments can be made after 14 days if needed. Please call the office to schedule a follow up visit.

Botox/Dysport/Xeomin treatments are a temporary procedure. Your treatment results will last approximately 3 to 4 months.

If you have questions or concerns regarding your treatment, please call the office at 303-532-2810.
